

Here's to your business success!

Dear Sir/Madam

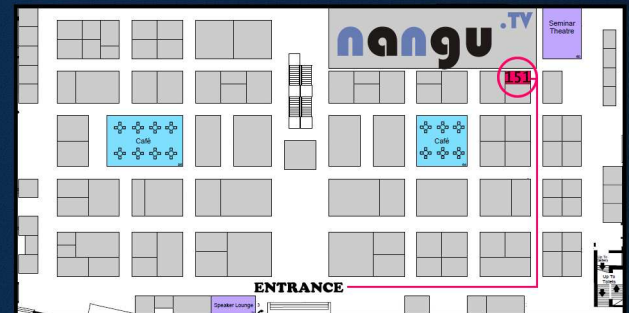

please let us invite you to the **nangu.TV** presentation on **IPTV WORLD FORUM 2010** which will take place at the Olympia National Hall, London from 23rd to 25th March.

The **nangu.TV** represents the most successful platform used by alternative Internet Service Providers in the Czech Republic and Slovakia for television and video content delivery including advanced value added services (pause live TV, startover TV and network personal video recorder). Unlike other "middleware only" vendors, we provide complete set of features and services including sophisticated video storage and streaming technology, usually available only for incumbent operators.

Come and visit our **stand No. 151** and experience the new features that **nangu.TV** has launched this year - such as **Operator's PVR, Timeshift TV, Over the Top content delivery, Streaming to iPhone** and support for **Hybrid solution**. We encourage you to seize this valuable and rewarding opportunity and look forward to seeing you.

Your **nangu.TV** team
