

OVERVIEW

nangu.TV brings you the IPTV platform in ready made package. The nangu.TV nPlay is a perfect solution for operators and system integrators who are thinking about starting their interactive TV services. nPlay is not just about middleware but it gives you complete solution with advanced non-linear TV features, such as Pause TV, Start Over, Time Shift and network PVR (nPVR). It supports set-top boxes, PC and mobile phones (smartphones).

How much does nPlay cost?

nangu.TV nPlays is **FREE**. You don't need to purchase any license from nangu.TV upfront. Please visit <http://nangu.tv/nplay> for installation instructions.

What can nPlay deliver?

Look and feel of nPlay is equivalent to full-featured nangu.TV Platform. Subscribers will feel like at home, when you upgrade to the full version. nPlay offers you support for 500 active STBs and provides recording services for a maximum of 10 channels.

nPlay offers

- middleware
- recording and streaming backend
- software (image) for Motorola's STB VIP 1003 and 19x3
- PC portal
- Smartphones portal
- complete documentation
- SDK for own application development
- access to other support facilities from nangu.TV

nangu.TV offers complementary training for platform administrators and operators. Please consult <http://nangu.tv/trainings> for registration and date availability.
